

1. Proposition

**eLibrary seems to be successfully
established in science and research**

2. Proposition

**There are doubts about the use of
eLibrary among students – presently
and even more in the future.**

3. Proposition

Daimler-Benz has closed its company library.

They gather information via HBZ, OELC or Amazon.

4. Proposition

Information retrieval behaviour:

70 % of students use „google search“

80 % trust in Wikipedia

5. Proposition

In the future new forms of information management will prevail:

data enrichment

data quality improvement

6. Proposition

Who will provide us with the demanded data:

Our local libraries?

Other organisations?

Thank you

I wish you a successful conference

(Take care)
